

HTML with CSS Exercise

Description: In this exercise, you will apply the CSS skills that you learned to an existing HTML document. The resulting page should look something like the screen shot that follows.

Andrew Ross Sorkin, author of *Too Big to Fail*

November 2015

New York Times columnist and author Andrew Ross Sorkin, has been described as "the most famous financial journalist of his generation." A leading voice on Wall Street and corporate America, his New York Times bestseller *Too Big to Fail*, was the first true, behind-the-scenes, moment-by-moment account of how that financial crisis developed into a global tsunami.

The Economist, The Financial Times, and Business Week all named *Too Big To Fail* one of the best books of the year. The book was published by Viking October 20, 2009. The book was adapted as a movie by HBO Films and premiered on HBO on May 23, 2011. The film was directed by Curtis Hanson, and the screenplay was written by Peter Gould.

Praise for *Too Big to Fail*

"Vigorously reported; superbly organized...for those of us who didn't pursue MBAs and have the penny-ante salaries to prove it."

Julia Keller, Chicago Tribune

"Sorkin's prodigious reporting and lively writing put the reader in the room for some of the biggest-dollar conference calls in history. It's an entertaining, brisk book."

Paul M. Barrett, The New York Times Book Review

The cast of the movie: *Too Big to Fail*

- William Hurt as Hank Paulson
- Paul Giamatti as Ben Bernanke
- Billy Crudup as Timothy Geithner
- Edward Asner as Warren Buffet

Date: Today's Date

1. Open the HTML and CSS files that follow, and note that the CSS file includes one rule set:
c05x_sorkin.html
styles\c05x_sorkin.css
2. Add a link element to the head section of the HTML file for the normalize.css/reset.css stylesheet.
3. Code a rule set for the html element that sets the background color to yellow.

4. Enhance the rule set for the body so the width is 650 pixels, and the body has a double blue border around it like the one above. If you need to make any other changes to the body, do that too.
5. Apply CSS styling for the footer that puts a blue border above it. Note that this border doesn't touch the border for the body.
6. Apply the CSS styling for the h1, h2, and h3 elements. The h1 font should be 28px, the h2 font should be 20px, and the h3 font should be 18px. The h1 font should also be blue. Then, apply appropriate margins or padding to the h1, h2, and h3 elements so the spacing before and after the headings is similar to what's shown above.
7. Style the <p>, blockquote, ul, and li elements so the spacing before and after the elements is similar to what's shown above.
8. Code a rule set for the cite element that changes its color to blue and removes the italics from the text.
9. Apply the CSS styling for the paragraphs. This rule set should right align the paragraphs. One way to do this is to add a class attribute to these paragraphs and use that class as the selector for the rule set.
10. Float the image to the left and apply appropriate margins or padding so the text flows to its right as shown above.
11. Apply CSS rules to the footer or the paragraphs within the footer so the font size is 15px, the font weight is bold, the paragraphs are centered, and the spacing above and below is similar to what is shown above.
